

What do you notice? What do you wonder?

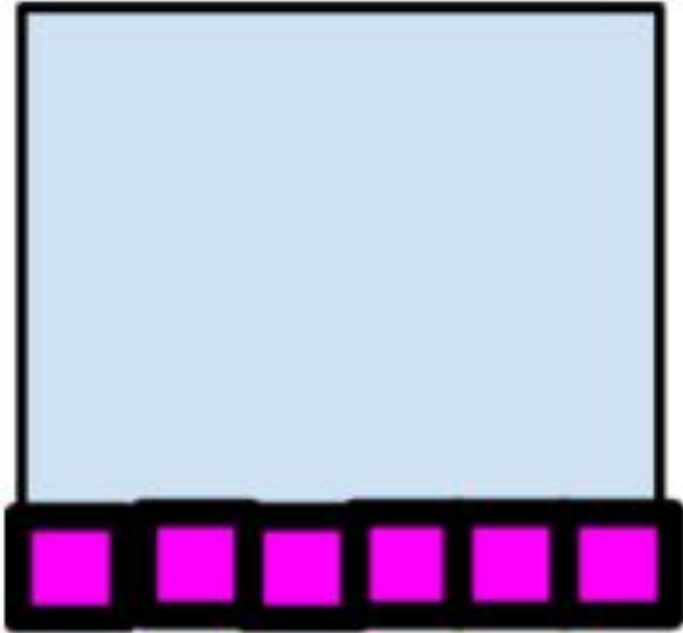

How many tiles will I need along the inside border of this area?

How would you define *border*?

Is a **border** the same thing as perimeter?

How many tiles do I need along the inside border?

This will be your job to find out in today's lesson!

Quick Write!

1. What is a variable?
2. What is an expression?
3. How can we rewrite the border strategies using variables?
