

**Designing an Ethnographic Study**  
**Module 2 Section 6**  
**Lecture 13**  
**Conclusion**

Let us summarise what we have spoken about in this module.

(Refer Slide Time: 00:13)

In unpacking ethnography, we introduced three major components -the process, the concepts that form its foundation, and tools that are used to carry out the research.

This brings us to the topic of our next module, which is, how to prepare ourselves for an ethnographic study. In Module III, we shall discuss all that we need to be conscious about when planning and designing our research.

This is a bit like planning for a trip. We may be open to exploring new places and meeting new people, but we still need to have the right gear to be equipped for the journey.

So come along with us, as we embark on this journey.
